

# Ahmed Hamdy

DevOps-Oriented System Administrator / Linux Infrastructure / Virtualization & Cloud Fundamentals

[ahmedhamdy2287@gmail.com](mailto:ahmedhamdy2287@gmail.com) | 01119433658 | Cairo-Egypt | <https://hamdyzone.icu/>

DevOps-oriented System Administrator with 3+ years of hands-on experience managing Linux infrastructure, virtualization platforms, and containerized environments. Proven ability to design and maintain scalable on-premise systems using Proxmox, Docker, and Nginx. Experienced in building and operating self-hosted platforms and internal networking architectures supporting multiple production services. Currently expanding into cloud technologies (AWS) and modern DevOps practices, with a strong focus on automation, high availability, performance optimization, and system reliability.

---

**Menoufia University** — Bachelor’s Degree, Commerce (English Section) 2019 – 2023

Grade: Good

Menoufia, Egypt

Studied business fundamentals including accounting, management, and economics. Developed analytical and problem-solving skills with a focus on practical applications.

---

**Croco-IT** — DevOps Engineer

2023 – Present

Egypt – Nasr City

- Designed and managed virtualized infrastructure using Proxmox (VMs & LXC containers) supporting multiple production services.
  - Built and maintained internal networking architecture for service isolation and scalability.
  - Deployed and managed self-hosted platforms (Nextcloud, ERPNext, GitLab) for internal and client environments.
  - Configured Nginx as a reverse proxy with SSL for secure multi-domain access.
  - Implemented containerized environments using Docker and Docker Compose.
  - Monitored system performance and improved service reliability and uptime.
  - Implemented backup strategies using Proxmox Backup Server.
  - Managed 10+ services across virtualized environments ensuring high availability.
  - Built a custom infrastructure orchestration system inspired by tools like Terraform and Ansible to automate service provisioning and deployment across virtualized environments.
-

## DevOps Infrastructure Platform (Self-Hosted)

*Present*

- Designed and built a self-hosted DevOps platform to manage and deploy multiple services.
- Implemented containerized environments using Docker and Docker Compose.
- Configured Nginx as a reverse proxy with SSL for secure access.
- Built and managed virtualized infrastructure using Proxmox (VMs & LXC containers).
- Designed internal networking architecture for service isolation and communication.
- Deployed and maintained open-source applications (Nextcloud, ERPNext, GitLab).
- Implemented backup strategies using Proxmox Backup Server.
- Focused on performance optimization, scalability, and system reliability.

## Production Infrastructure – Almasry Pharmacy Website

- Designed and deployed production server infrastructure for a live business website.
- Configured and optimized Nginx for high performance and efficient request handling.
- Improved website performance, reducing load time and increasing stability under traffic.
- Implemented SSL and secure configurations for safe client access.
- Managed server resources and monitored system performance.
- Supported a live production environment handling real user traffic.

## Custom Infrastructure Automation System

- Designed and developed a custom automation system to provision and manage infrastructure services.
- Inspired by Infrastructure-as-Code tools like Terraform and Ansible.
- Used for deploying and managing multi-service environments across virtual machines and containers.
