

Ahmed Hamdy

DevOps & Infrastructure Engineer | Linux | Virtualization | Containers | Self-Hosted Infrastructure

Cairo, Egypt | 01119433658 | ahmedhamdy807@outlook.com | <https://ahmed2287.github.io/>

PROFESSIONAL SUMMARY

DevOps & Infrastructure Engineer with 3+ years of hands-on experience managing Linux-based infrastructure, virtualized environments, and containerized applications. Experienced in designing, deploying, and maintaining self-hosted infrastructure using Proxmox, Docker, Docker Compose, Nginx, and Proxmox Backup Server. Skilled in production services, reverse proxies, SSL/TLS, internal networking, backups, monitoring, and system reliability. Hands-on experience with Nextcloud, ERPNext, and GitLab, with a strong focus on infrastructure automation, performance optimization, scalability, and reliability.

TECHNICAL SKILLS

Linux & System Administration: Linux, Ubuntu, Debian, System Troubleshooting, Service Management, Performance Monitoring, Backup & Recovery

Virtualization & Infrastructure: Proxmox VE, Virtual Machines, LXC Containers, Proxmox Backup Server, Infrastructure Design

Containers & Deployment: Docker, Docker Compose, Containerized Applications, Multi-Service Deployments

Web & Networking: Nginx, Reverse Proxy, SSL/TLS, DNS, Linux Networking, Internal Network Architecture, Service Isolation

Databases & Infrastructure Services: MySQL, MariaDB, Redis, RabbitMQ

DevOps & Automation: Infrastructure Automation, Service Provisioning, Deployment Automation, GitLab, Self-Hosted Platforms, DevOps Fundamentals

Monitoring & Reliability: Log Monitoring, Alerting, System Monitoring, Performance Optimization, Service Reliability, Backup Strategies, High Availability Concepts

Cloud: AWS Fundamentals, Cloud Concepts

PROFESSIONAL EXPERIENCE

Croco-IT — DevOps & Infrastructure Engineer

2023 – Present | Nasr City, Egypt

- Designed and managed Linux-based virtualized infrastructure using Proxmox VE, supporting multiple production services across virtual machines and LXC containers.
- Designed and maintained internal networking architecture to improve service isolation, communication, and scalability.
- Deployed and operated self-hosted platforms including Nextcloud, ERPNext, and GitLab for internal and client environments.
- Built and maintained containerized environments using Docker and Docker Compose.
- Configured Nginx as a reverse proxy for multiple applications and domains, including SSL/TLS configuration and secure external access.
- Managed production services, monitored system performance, and performed troubleshooting to improve reliability and stability.
- Implemented backup and recovery strategies using Proxmox Backup Server.
- Managed multiple services across virtualized environments, focusing on uptime, resource utilization, and operational stability.
- Designed and developed a custom infrastructure automation platform to simplify service provisioning and deployment across virtual machines and containers.

SELECTED PROJECTS

LogFlow — Log Monitoring, Search & Alerting Platform

- Designed and built a centralized log monitoring platform for collecting, tracking, and analyzing application and system logs.
- Implemented log search and filtering capabilities to quickly investigate errors and operational issues.
- Added automated monitoring rules to detect error patterns and potential problems in log streams.
- Configured alerting workflows to send notifications when predefined errors or abnormal conditions are detected.
- Focused on improving troubleshooting speed, incident visibility, and operational awareness across monitored services.

EDUCATION

Menoufia University — Bachelor's Degree in Commerce, English Section | 2019 – 2023 | Menoufia, Egypt | Grade: Good

LANGUAGES

Arabic — Native | English — Professional Working Proficiency
